About me

Full-stack engineer with nearly 10 years of experience building production systems in travel, live broadcasting and business automation. I started as a .NET developer and now work across NextJS, React, NestJS, NodeJS, Python and PHP, owning features from database design to deployment.

Much of my work has run under tight real-time constraints: live flight booking and ticketing through the Amadeus API, on-air graphics control for live sports broadcasts, and GPS tracking of field staff. Since 2024 I have led engineering at AIM Digital UK, building AI automation pipelines, a travel Customer Relationship Software and a staff attendance platform. I also work directly with clients to scope requirements and turn them into working software.

Work experience

Lead Software & AI Automation Engineer 01/12/2024 - Current

AIM DIGITAL UK LIMITED | KINGTON, United Kingdom

Lead engineer at AIM Digital UK (founded 2024), a UK company building AI automation, SaaS and web products for businesses. I take each product from idea to production, from database design and APIs through to the dashboards and mobile apps people use every day.

- Staff attendance and GPS tracking: Built a platform that records attendance through devices and tracks field staff location in real time from a mobile app. A Next.js dashboard gives managers live visibility of attendance, location and field activity.
- AI content automation: Built a three-workflow n8n system that publishes to LinkedIn, Facebook, Instagram and Pinterest. It plans weekly content with the Claude API using live web trends, generates images and video daily through fal.ai, and sends health alerts to Telegram. Supabase holds the content queue and configuration, Cloud-flare R2 stores media.
- Travel CRM: Designing a CRM for travel agencies with NestJS, Next.js, Prisma and PostgreSQL, structured on SOLID principles with Zod validation across the stack.
- easytrip.com.pk: In Process.
- AI lead distribution: Built Python services that assign leads automatically and track their progress.
- APIs and DevOps: Design secure REST APIs, integrate payment, messaging and social platforms, and run CI/CD pipelines and Docker deployments on Linux servers.
- Client work: Work directly with clients on requirements, scoping and technical proposals, then lead delivery.

MERN STACK ENGINEER

01/05/2023 - 30/11/2024

TRAVEL CHANNEL INT'L PVT LTD | Lahore, Pakistan

- Back-end engineer on Faremakers.com, one of Pakistan's online travel booking platforms. I connected the site to the global airline booking system so customers could search, book and receive tickets in real time.
- Integrated the Amadeus Enterprise API into the NestJS Back-end, enabling live
- flight search, booking and ticket issuance directly on the website.
- Real-time booking flow: Rebuilt the booking journey so customers see live availability and get a confirmed ticket in a single session.
- Strengthened payment and transaction handling for faster, more reliable checkout.
- Replaced manual booking and ticketing steps with automated processes, reducing operational workload.

Business or sector Other service activities | **Department:** Information Technology | **Email:** support@faremakers.com | **Website:** https://www.faremakers.com/

Solutions developer

01/01/2022 - 30/04/2023

FastSports.tv | Lahore, Pakistan

Developer in the live production team of FastSports.tv, a sports broadcaster. I built the software that drives on-air graphics during live matches, where any delay or error is seen by viewers instantly.

- Vizrt graphics control: Built a .NET system that controls Vizrt graphics and rendering engines from the production control room.
- Live text updates: Automated real-time text replacement so scores, names and stats on screen update the moment the game changes.
- Director triggers: Added command-based triggers that let directors fire graphics and scene transitions on cue.
- Broadcast integration: Integrated the system into the existing Vizrt infrastructure, where it ran reliably through live events.

Senior DotNet Developer

01/08/2017 - 31/12/2021

Faremakers.com | Lahore, Pakistan

Core developer on the team that built Faremakers.com and the CRM behind it. My work connected marketing,

sales and customer support so every lead and conversation landed in one system.

- Website and CRM: Co-built the Faremakers website and its integrated CRM, linking customer bookings to sales and support tracking.
- Automated lead capture: Pulled leads from Facebook Lead Ads (advanced API access) and Google Ads forms straight into the CRM, with no manual entry.
- WhatsApp messaging: Built two-way WhatsApp chat through the Infobip API, with webhooks for real-time messages and support for PDFs, images and audio.
- Call-centre app: Developed a private Android app in Java that automated the telemarketing workflow, connected to CRM

microservices for live customer data.

Web programmer

20/08/2016 - 31/07/2017

SolutionWin Technologies | Lahore, Pakistan

Web developer at a software agency, building websites for retail and service clients in Pakistan,UAE and Egypt.

• Samir and Aly: Built a responsive e-commerce platform; online sales rose 35% after launch.

• Busy Bees Dubai: Integrated Google Maps and location services and streamlined registration, cutting

manual effort by 40%.

• Babolat: Contributed to the website's design and front-end build.

Education & Training

Bachelor of Science In Computer Science

01/09/2012 - 30/09/2016

University of Lahore | Lahore, Pakistan

- **Designed and developed iTraveller Android Application**

  to provide real-time information on current location, nearby bus stops, and bus routes, including stops, destinations, and timings.
- **Implemented a web-based admin panel**

  for centralized management of route mapping, bus schedules, and data updates via an online database.
- **Configured the online database to handle coordinates for route mapping**

  bus timings, ensuring accurate and efficient public transport guidance.Eliminated dependency on third-party services like Google Places by creating a custom database solution.

  Enhanced user convenience with an intuitive interface and detailed transport information, improving accessibility and usability.

Field(s) of study: Inter-disciplinary programmes and qualifications involving Information and Communication Technologies (ICTs) , Computer use | **Final grade:** 2.71 | **Level in EQF:** 6 | **National classification:** 6 | **Type of credits:** 133 | **Number of credits:** 133 | **Thesis:** iTraveller Android Application with Admin Panel | **Address:** 1-Km Defence Road, near Bhuptian Chowk, Lahore, Punjab54000 | **Website:** https://cs.uol.edu.pk

HSSC

08/09/2010 - 08/09/2012

Govt Islamia College (Railway Road) | Lahore, Pakistan

- **Organic Chemistry:**
  - Studied the principles of **organic compounds**, their structure, properties, and reactions.

- Explored topics such as **reaction mechanisms**, **functional groups**, and **synthesis of organic molecules**.

- **Inorganic Chemistry:**
  - Gained knowledge in **elemental chemistry**, focusing on metals, non-metals, and their compounds.
  - Studied **coordination chemistry**, **periodic trends**, and **chemical bonding**.
- **Mathematics:**
  - Worked on **derivations**, **integration**, and **differentiation** to solve mathematical problems.
  - Focused on **matrix theory** and its applications, including **determinants** and **solutions of systems of equations**.
  - Applied **calculus** concepts to problems in chemistry and physics, ensuring a strong foundation in problem-solving.

Skills and Competencies:

- Gained proficiency in applying **chemical concepts** to real-world scenarios.
- Developed strong **analytical** and **problem-solving** abilities, especially in **mathematics** and its integration with chemical principles.
- Enhanced **quantitative** and **qualitative** analysis skills through laboratory work and theoretical studies.

Field(s) of study: Natural sciences, mathematics and statistics not further defined , Chemistry , Mathematics | **Final grade:** C | **Level in EQF:** 4 | **National classification:** 4 | **Type of credits:** 1100 | **Number of credits:** 633 | **Website:** https://www.facebook.com/g.islamiacollegerailwayroad/

Secondary School Certificate

04/08/2008 - 04/08/2010

Akbari Public School | Lahore, Pakistan

Chemistry: Studied fundamental concepts of matter, chemical reactions, and properties of substances.

Physics: Gained knowledge of core physical principles, including **laws of motion**, **gravity**, and the basics of **electric instruments**.

Biology: Focused on the study of living organisms, their structures, functions, and interactions with their environment.

Practical Skills: Learned the usage of **screw gauge** and **Vernier caliper** for precise measurement, as well as foundational knowledge of physical measurement tools.

Field(s) of study: Biological and related sciences not further defined , Chemistry , Physics , Mathematics | **Final grade:** B | **Level in EQF:** 3 | **National classification:** 3 | **Type of credits:** 1050 | **Number of credits:** 706 | **Website:** https://akbarischool.edu.pk/

Hobbies and Interests

Cricket

A team sport that combines strategy, skill, and physical fitness. I enjoy playing cricket for its focus on teamwork, precision, and the thrill of competition. It enhances my decision-making, coordination, and ability to perform under pressure while fostering camaraderie.

Basket Ball

Served as the vice captain of the basketball team, demonstrating

leadership, teamwork, and strategic decision-making. Assisted in motivating the team, organizing practices, and contributing to overall game strategies while fostering team spirit and collaboration.

Carrom

Enjoy playing Carrom with family, primarily through mobile app. It enhances focus, strategic thinking, and provides a fun way to bond with loved ones in a relaxed setting.
